-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4-6, and 11-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Duncan et al. (5,480,074). Duncan discloses a humanlike form with at least one projection that is structurally adapted to suspend an article of clothing. With respect to Claim 2, the humanlike form is three-dimensional having a head, a neck, a torso, two arms, two legs, and two feet. With respect to Claim 4, the humanlike form has a plurality of projections extending from the torso. With respect to Claim 5, a leg has at least one projection that is structurally adapted to suspend an article of clothing. With respect to Claim 6, the projection extending from the leg of the humanlike form is a circular loop that is structurally adapted to hang socks. With respect to Claim 11, each arm has an inner portion and an outer portion with a hand attached to the outer portion. The inner and outer portions are pivotally connected and the hand portion may be oriented with the palm facing up for holding articles. With respect to Claim 12, the palm of the hand appears to be concave in FIG. 9. With respect to Claim 14, the upper and lower torso portions are adjustably connected. With respect to Claim 15, the legs each have an upper and a lower portion adjustable connected together. With respect to Claim 16, the neck is adjustably connected to the upper torso.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 42 and 43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Duncan et al. (5,480,074). Duncan essentially teaches the invention of Claim 42, but fails to teach the presence of a base member. However, it is well known in the mannequin and display art to provide a base member for a mannequin to sit upon. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the mannequin of Duncan with a base member to sit upon for increased visibility. With respect to Claim 43, the palm of the hand appears to be concave in FIG. 9.

5. Claims 3, 7-10, 17-41, and 44-54 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
